

Bronson, a 13yr old Beagle had previously had ACL surgery to both stifles and with age, he now has arthritis and mobility problems. Bronson received Bowen Therapy and some homeopathic and biochemic remedies from Helen.

Leslie Smith comments 4 weeks post treatment " Hi Helen, I'm pleased to say Bronson is doing well. I haven't seen him left his leg in a while despite taking him on a couple of long walks. I also haven't seen him struggle or look arthritic when he first gets up off his bed. Drops are working very well and despite his age he is very active and spritely. Thanks again"
